Welcome from the World Congress Chair

Welcome to the XVII UIP World Congress, hosted by the American College of Phlebology (ACP). The ACP Staff, member and non-member volunteers, the Scientific Committee, the Program Committee, and the UIP Executive Committee under the leadership of Past-President Eberhard Rabe and current President Angelo Scuderi, have all worked incredibly hard for nearly five years to bring this outstanding Congress to fruition.

In planning this important meeting, the goal has been to present the most extensive and comprehensive scientific meeting of the UIP ever convened by bringing together the world's leading experts to address the full spectrum of topics in the field of phlebology and to provide the most up-to-date scientific information available. For the first time, all plenary sessions will feature simultaneous Spanish translation. Additionally, translators will be available in the Hynes convention center to help non-English speakers navigate their way to their destinations and activities.

The Hynes Convention Center was chosen specifically for its convenient location close to hotels, restaurants, and shopping, all within a few minutes' walk. This should afford you the opportunity throughout the week to meet and reunite with colleagues from around the world. We have put together a great social program, since there is much to see and enjoy around pedestrian-friendly Boston during colorful autumn in New England. The Program Committee has planned a free afternoon for Wednesday September 11 so you can explore Boston, take in the sights, or simply spend time with old friends and new acquaintances. Some events you won't want to miss during Congress week are the Opening Ceremony on Sunday evening, the Opening Reception and Casino Night on Monday, the ACP Foundation Donor and New Member Reception on Tuesday evening, and the Silent Auction which runs from Monday until Thursday. And above all make sure you don't miss the spectacular gala dinner on Thursday evening, September 12.

Updates and featured segments of the program will be regularly posted and sent electronically to apprise you of all that is in store at UIP XVII World Congress. On behalf of the American College of Phlebology, I extend a warm welcome and look forward to seeing you, your family, and your friends here in Boston.

Best Regards,

NICK MORRISON, MD, FACS, FACPh, RPhS

President, UIP XVII World Congress Vice-President, North American Region, UIP

the premier association for vein care professionals.

The American College of Phlebology (ACP) is comprised of more than 2,000 physicians and allied health care professionals, who are setting the pace and direction for growth in the field of vein care. The ACP offers members advocacy, continuing education and training in the latest science and techniques with the goal of improving standards and the quality of patient care.

If you treat or have an interest in venous and lymphatic disease, the ACP is an unequivocal resource for your practice.

General Information

ON-SITE REGISTRATION HOURS

Registration is located in the Pre-Function C area on the second floor of the Hynes Convention Center. Registration Hours are:

Sunday, September 8, 2013
Monday, September 9, 2013 6:00 AM - 6:00 PM
Tuesday, September 10, 2013 6:00 AM - 6:00 PM
Wednesday, September 11, 2013 6:00 AM - 1:00 PM
Thursday, September 12, 2013 6:00 AM - 6:00 PM
Friday, September 13, 2013 6:00 AM - 6:00 PM

EXHIBIT HOURS

Exhibits will be located in Hall C and D of the Hynes Convention Center during the following hours:

Monday, September 9, 2013
Tuesday, September 10, 2013
Wednesday, September 11, 2013
Thursday, September 12, 2013
Friday, September 13, 2013

SPEAKER READY ROOM HOURS

The Speaker Ready Room is located in room 305 of the Hynes Convention Center during the following hours:

Sunday, September 8, 2013	10:00 AM - 6:00 PM
Monday, September 9, 2013	6:00 AM - 6:00 PM
Tuesday, September 10, 2013	6:00 AM - 6:00 PM
Wednesday, September 11, 2013	. 6:00 AM - 1:00 PM
Thursday, September 12, 2013	6:00 AM - 6:00 PM
Friday September 13, 2013	6:00 AM = 6:00 PM

General Information (Continued)

INTERNET

The Hynes Convention Center offers free wireless internet service throughout meeting rooms, lobbies and expo halls; just open your internet browser and look for the Hynes Wireless Network. The service is designed for casual users and not guaranteed. There are also a limited number of terminals with Internet access in the exhibit hall.

CAMERA/RECORDING POLICY

Use of cameras (all types) and audio recorders is prohibited in all educational sessions and on the exhibit floor. Violations of this policy will result in removal from the room and confiscation of equipment. Staff will be closely monitoring such occurrences.

CELL PHONE POLICY

Cell phone usage and/or disruption is prohibited in all educational sessions. Please remember to turn off your cell phone or put on vibrate prior to entering the meeting room.

LITERATURE DISTRIBUTION

NO literature can be distributed in meeting rooms, registration areas, and all public areas of the Hynes Convention Center and all host hotels.

PHOTOGRAPHS

The ACP reserves the right to take photos at the UIP XVII World Meeting and to publish the photos in ACP marketing materials. By registering for this meeting, you agree to allow ACP to use your photo in any ACP or UIP-related publication or website. If your photo appears on the website or in a publication, and you prefer that we discontinue using the image, please contact the ACP headquarters office to identify the photo.

Events

Make the most of the meeting by spending time with your colleagues and friends outside the seminar room. After-hours Congress events include:

OPENING CEREMONY

Sunday, September 8, 2013 5:30 PM - 6:30 PM

(Open to all registrants. No additional fee.)

Join Dr. Nick Morrison, UIP XVII World Meeting Organizing Committee Chair, to find out what to expect over the next five days! Special entertainment to take place!

WELCOME RECEPTION

Monday, September 9, 2013 6:00 PM - 7:30 PM

(Open to all registrants. no additional fee.)

Start the meeting by visiting with your colleagues and mingling with our exhibitors in a social setting.

CASINO NIGHT

Monday, September 9, 2013 7:30 PM - 10:30 PM

Spin the roulette wheel, or double down on a game of Blackjack, as the ACP Foundation presents Casino Night. The action will be fast and furious, with exciting prizes given to those with luck on their side. RSVP's are encouraged.

ACPF DONOR AND ACP NEW MEMBER RECEPTION

Tuesday, September 10, 2013 6:00 PM - 7:30 PM

(By invitation.)

Events (Continued)

SILENT AUCTION

September 9-12, 2013

The ACP Foundation will be hosting the 6th Annual Silent Auction during the XVII UIP World Meeting. Attendees will have an opportunity to bid on medical related products and services, sports items, vacation getaways, and much more. The Silent Auction is always a unique and entertaining event, from which all proceeds are dedicated to the mission of the foundation. Auction items will be displayed throughout the Meeting, with bidding opening Monday, September 9th and closing Thursday, September 12th.

GALA DINNER

Thursday, September 12, 2013 7:00 PM to 11:00 PM (Open to all. Additional fee required.)

The Gala Dinner will take guests on a delicious journey of the United States, sampling regional fare and entertainment from the cutting edge culture of New York to the bohemian coffeehouses of Seattle, from the glitz and glamor of Las Vegas to jazz infused New Orleans, and all points in between. Make sure to join your colleagues Thursday night for this tasty tour of the land of liberty.

Workshop Descriptions

MINI PHLEBECTOMY, ULTRASOUND-GUIDED SCLEROTHERAPY AND SURFACE SCLEROTHERAPY

Monday, Thursday and Friday, 2:00pm - 4:00pm - Additional Fee; Ticket Required
During this session attendees will use phantom models some with ultrasound
to learn and become comfortable with different methods of vein access for
sclerotherapy. Treatment plans according to the size and location of the veins
will be discussed. Pre and post treatment protocols will be reviewed. All vein
treatment with injection sclerotherapy will be discussed and hands-on practice
will be available for attendees. Unique sclerotherapy models will be available to
perform surface sclerotherapy.

In addition there will be phlebectomy models for hands-on training. Simulation models will be used to perform mini-phlebectomy incisions and using hooks simulation of removal of vasricosities will be performed.

ENDOVENOUS ABLATION

Monday and Thursday, 2:00pm - 4:00pm - Additional Fee; Ticket Required

During this session leg phantom models will be used to review technical steps of endovenous ablation. Attendees will have the opportunity to obtain vein access, sheath placement, catheter advancement and positioning. Different endovenous technologies will be discussed for saphenous ablation including laser and radiofrequency. Technical tips to overcome challenging venous anatomy will be discussed. Indication, limitation and complications will be reviewed

ULTRASOUND

Monday and Thursday, 2:00pm - 4:00pm - Additional Fee; Ticket Required

MONDAY - During this workshop, attendees will be guided through a diagnostic venous duplex examination on live models. The workshop focus will include ultrasound diagnostic techniques, ultrasound identification of the deep and superficial compartments, and perforators. Ultrasound ergomonics will also be discussed. This hands on session is intended for individuals with limited ultrasound skills. Attendees will have "hands-on" opportunity to use the ultrasound device on live models.

THURSDAY - During this ultrasound workshop, attendees will be guided through a diagnostic venous duplex examination on live models. The workshop focus will be on demonstrating reflux provoking maneuvers, the pitfalls in duplex diagnosis, and venous hemodynamics. This hands-on session is intended for individuals interested in venous reflux detection and the variations in ultrasound techniques.

Workshop Descriptions (Continued)

PELVIC VEIN EMBOLIZATION

Monday and Thursday, 2:00pm - 4:00pm - Additional Fee; Ticket Required
During the workshop attendees will use a flow model to perform an ovarian
vein embolization. Technical steps of vein access and techniques for
embolization will be discussed. Indications and complications will be reviewed.
Using fluoroscopic guidance steps for ovarian vein selective catheterization and
coil embolization will be performed.

COMPRESSION THERAPY

Tuesday and Friday, 2:00pm - 4:00pm - Additional Fee; Ticket Required
During this workshop attendees will have hands-on experiences with applying different compression devices (multi-component bandages, self-adjustable Velcro-band devices and compression stockings) on their own legs. Interface pressure measurements will help to understand the physical property and the different mode of action of each device and to enable the attendees to perform proper compression, adjusted to various indications (chronic edema and lymphedema, leg ulcers, deep vein thrombosis and postthrombotic syndrome, compression after varicose vein procedures).

PHARMACOMECHANICAL THROMBOLYSIS

Tuesday and Friday, 2:00pm - 4:00pm - Additional Fee; Ticket Required
Using flow models under fluoroscopic guidance, the attendee will go
through the steps of performing pharmacomechanical thrombolysis.
Indications and timing for thrombolysis will be discussed. Indications
and techniques for venous stenting will be reviewed. Advantages and
disadvantages of available devises will be reviewed.

Workshop Descriptions (Continued)

IVC FILTER PLACEMENT AND RETRIEVAL

Tuesday, 2:00pm - 4:00pm - Additional Fee; Ticket Required

Attendees during this session will have hands-on experience with placement of IVC filter from the femoral approach. Using simulation models, attendees will obtain catherter access into the IVC, select appropriate position for filter placement and deploy IVC filter. Indications for IVC filter placement will be discussed. Using the simulation model attendees will also have the opportunity to retrieve an IVC filter. Technical tips for successful retrieval will be discussed.

IVUS

Tuesday and Friday, 2:00pm - 4:00pm - Additional Fee; Ticket Required

During this workshop attendees will use an anatomic model to perform IVUS and identify anatomic structures and pathologic lesions. Simulation models will help attendees become comfortable identifying venous anatomy from the hepatic veins to the femoral veins. Attendees will learn to use IVUS to make measurements, identify areas of stenosis and recognize compression versus thrombus. Attendees will also become familiar with using IVUS to determine location and sizing of stents in the venous system.

turn your home or office into a campus.

introducing the American College of Phlebology's Online Education Center.

Whether it's at work, home, or on the go, you now have the convenience and efficiency of earning continuing medical education credit and improving patient care with the American College of Phlebology's (ACP)
Online Education Center. Courses cover a wide range of topics related to venous and lymphatic disease.
Course discounts apply to ACP members.

some of our most recent offerings include:

- © CCSVI: To Treat or Not to Treat
- Cosmetic Ireatment of Facial Veins and Telangiectasia
- Duplex Ultrasound- Why and How
- $oldsymbol{\mathfrak{D}}$ Electronic Health Records and Your Bottom Line

CE/CME Information

TARGET AUDIENCE

The primary target audience for the UIP World Meeting includes USA based and international Physicians, Physician Assistants and Advanced Registered Nurse Practitioners, Ultrasound Technologists, Nurses, allied health and all other healthcare professionals currently or planning to care for patients with venous disease. Specialties focusing on Phlebology, Cardiology, General Surgery, Vascular Surgery, Interventional Radiology, Interventional Cardiology, Dermatology, Dermatologic Surgery, Internal Medicine, Family Practice, Plastic Surgery, Obstetrics and Gynecology, Vascular Medicine, Nursing and Sonography are invited to enhance their knowledge and skills specific to venous disease.

OBJECTIVES

At the conclusion of this activity, participants will be able to:

- Use selective testing modalities to diagnose chronic and acute venous disease and insufficiency of the abdomen, pelvis, and extremities or other venous pathology including deep vein thrombosis and vascular malformations.
- 2. Describe and demonstrate the various techniques for treating venous disease.
- 3. Distinguish indications and contraindications for different treatment modalities.
- 4. Measure and compare the outcome of the various techniques in treating venous disease.
- 5. Describe the evaluation and modern management of lymphedema.

EVALUATIONS AND CERTIFICATES

Please complete an evaluation to document your attendance, provide the American College of Phlebology (ACP) with crucial outcome measurement data, and receive your certificate for the UIP XVII World Meeting. This will permit the American College of Phlebology (ACP) to continue to enhance your personalized professional development and plan the 2014 American College of Phlebology Annual Congress Conference. You will be able to access your certificate after the evaluation.

In order to obtain your AMA PRA Category 1 Credit(s)[™] certificate, Nursing certificate, SVU certificate, or Certificate of Attendance for this activity please complete the online Credit Claim Form (see separate handout in your registration packet). Forms should be completed in full within two weeks of the completion of the meeting (9/28/2013). Certificates can be printed (or emailed) immediately following the completion of this online form.

CE/CME Information (Continued)

ACCREDITATION AND CREDIT STATEMENTS

The American College of Phlebology is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The American College of Phlebology designates this live activity for a maximum of 37.75 AMA PRA Category 1 Credits $^{\text{TM}}$. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

AMERICAN ACADEMY OF FAMILY PHYSICIANS (AAFP)

Application for CME credit has been filed with the American Academy of Family Physicians. Determination is pending.

SOCIETY FOR VASCULAR ULTRASOUND (SVU)

This program meets the criteria for thirty seven and one half (37.75) SVU-CMEs which are accepted by the American Registry of Diagnostic Medical Sonographers (ARDMS)® towards recertification, the American Registry of Radiologic Technologists (ARRT) for Category A credit, and the Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL) for laboratory accreditation.

NURSING CREDITS

Provider approved by the California Board of Registered Nursing, Provider Number CEP15857 for 45 contact hours.

Disclosures

SPEAKER DISCLOSURE STATEMENT AND DISCLOSURE FOR DISCUSSIONS OF OFF-LABEL/ INVESTIGATIONAL USE OF PHARMACEUTICAL PRODUCTS

In accordance with ACCME Standards for Commercial Support of Continuing Medical Education and the American College of Phlebology's (ACP) disclosure policy for CME activities, all individuals who contribute to the content or the identification / resolution of potential conflicts of interest must disclose any relationship they may have with any entity producing, marketing, re-selling, or distributing health care goods or services consumed by, or used on, patients. Such disclosure is intended to provide participants with sufficient information to evaluate whether any given presentation has been influenced by the faculty's relationships(s) or financial interest with said companies.

Circumstances create a conflict of interest when an individual has an opportunity to affect CME content about products or services of a commercial interest with which he/she has a financial relationship. The purpose for identifying and addressing potential conflicts of interest is to ensure a proper balance, independence, objectivity and scientific rigor of the ACP's educational activities. The ACP does not view the existence of a financial relationship as necessarily implying bias or decreasing the value of participation in CME activities, but must ensure that a financial interest is not a conflict of interest.

Identifying Conflict of Interest: A six-tier peer review system has been developed to identify possible conflicts of interests.

- + The first tier is the Speaker (also Moderators, Panelists, and Session Chairs)
- + The second-tier is the CME Director
- + The third-tier is the CME Annual Congress Chair
- + The fourth-tier is the CME Program Chair and/or his designees
- + The fifth-tier is the Course Program Chair and/or his designees
- + The sixth-tier is the Meetings Director

ACP'S CME LEADERSHIP AND STAFF:

Melvin Rosenblatt, MD, FACPh, CME Committee Chair Has nothing to disclose.

Dana DePonzi-Haas, Meetings Director Has nothing to disclose.

Heather Durband, CME Director Has nothing to disclose.

Max Abrams, Meetings Coordinator Has nothing to disclose.

All individuals in a position to control content not listed on the following pages state they have nothing to disclose.

	Controversies in Compression Therapy	306
	Complications of Venous Interventions	311

How to ask a question

during a session at the UIP World Meeting

Microphones for questions will not be available during individual sessions, but attendees will be given the opportunity to ask questions of speakers electronically two different ways:

TEXT:

Text your room code followed by your question to phone number 22333. Find your room code below.

WEB:

Go to pollev.com and type your room code followed by your question. Find your room code below.

SEPTEMBER 9-12, 2013 HYNES CONVENTION CENTER

The ACP Foundation will be hosting the 6th Annual Silent Auction at the XVII UIP World Meeting. Attendees will have an opportunity to bid on medical related products and services, sports items, vacation getaways, and much more. The Silent Auction is an exciting and unique event, from which proceeds are dedicated to the mission of the Foundation. Auction items will be displayed throughout the meeting, with bidding opening Monday, September 9th and closing Thursday, September 12th.

FOR MORE DETAILS AND A CATALOG OF ITEMS,
PLEASE VISIT THE SILENT AUCTION
NEXT TO REGISTRATION

Tuesday September 10, 2013

TIME	TOPIC	
6:00am - 6:00pm	Registration/Information	PreFunction C

FREE PAPER SES BASIC SCIENCE Chair: Felizitas Panniel Discussants: Mehmet F		allroom A/B/C
4:30pm - 4:35pm	Assessment of Cell Death Pattern of a Varicose Vein Organ Culture Model Chung Sim Lim, MD	
4:35pm - 4:40pm	Pleiotropic Properties of Glycosaminoglycan Sulodexide in Chronic Venous Disease: In Vitro Modulation of Chemokines and Colony Stimulating Factors Ferdinando Mannello, PhD	
4:40pm - 4:50pm	Mechanical Stretch Alters Metabolism of Vein Wall; An Ex-Vivo Animal Study Muzaffar Ali Anwar, MBBS, MRCS	
4:50pm - 5:00pm	Detergent Sclerosants are Consul Circulating Blood Cells David Connor, PhD	med by
5:00pm - 5:10pm	Morphological Changes in Humar and Leukocytes After Exposure to Sclerosants Osvaldo Cooley Andrade, MD	

5:10pm - 5:20pm	The Effect of Distance from the Injection Site on Procoagulant Activity in Patients Undergoing Foam Sclerotherapy Kurosh Parsi, MBBS, MSc Med, PhD, FACD, FACP	
5:20pm - 5:30pm	Measurements of Calf Muscle Oxygenation During Standing and Exercise in Patients with Chronic Venous Insufficiency Takashi Yamaki, MD	
5:30pm - 5:40pm	Histological Analysis of Sclerotherapy, Laser 940, Ohmic Thermolysis, and Intense Pulsed Light, on Leg Vein Telangiectasias Ronald Bush, MD, FACS	
5:40pm - 5:50pm	Comparing the Hemodynamic Effect in Healthy Subjects of a Neuromuscular Stimulation Device to Intermittent Pneumatic Compression Katherine Williams, MBBS	
5:50pm - 6:00pm	Anatomical Variations of the Femoral Vein Jean-Francois Uhl, MD	
NEW ANTICOAG ROLE IN VTE Chair: Stephanie Dento Discussant: Malay Pate	•	
4:30pm - 4:40pm	Oral Direct Thrombin Inhibitors Kathleen Gibson, MD	
4:40pm - 4:50pm	Oral Xa Inhibitors Russell Hull, MD	
4:50pm - 5:00pm	New Anticoagulants and the Management of Bleeding Complications Thomas Wakefield, MD	
5:00pm - 5:10pm	When Should Use of the New Anticoagulants be Considered in VTE? Stephanie Dentoni, MD	
5:10pm - 5:20pm	Anticoagulant Strategies for Reducing Post- Thrombotic Syndrome Susan Kahn, MD, MSc	
5:20pm - 5:30pm	Discussion Malay Patel, MD	
5:30pm - 6:00pm	Panel Discussion All Speakers	
ABLATION TECH	NIQUES FOR Rm. 304	
THE SAPHENOUS		
Chair: Marlin Schul, MD Discussant: Steven Elia	D, MBA, RVT, FACPh	
4:30pm - 4:40pm	Radiofrequency Ablation of the Great Saphenous Vein Sanja Schuller-Petrovic, MD	
4:40pm - 4:50pm	Endovenous Ablation of the Anterior Accessory Great Saphenous Vein: "Experimental" or Proven Therapy? Amanda Shepherd, MD	

4:50pm - 5:00pm	Endovenous Ablation of the Small Saphenous Vein: Tips for Success Dermot Moore, MD	
5:00pm - 5:10pm	Is There (Still) a Role for Endothermal Ablation of Perforator Veins? Thomas O'Donnell, MD	
5:10pm - 5:20pm	Complications of Endothermal Ablation Mark Malouf, FRACS	
5:20pm - 5:30pm	Radiofrequency, Laser, Surgery, or Foam for Great Saphenous Ablation: How to Choose? Lars Rasmussen, MD, DMSC	
5:30pm - 5:40pm	Discussion Steven Elias, MD, FACS, FACPh	
5:40pm - 6:00pm	Panel Discussion All Speakers	
CHRONIC ILIOF Chair: Peter Pappas, N Discussant: Oscar Mal		
4:30pm - 4:40pm	Characteristics of the Perfect Venous Stent: Do We Have It? Peter Neglen, MD	
4:40pm - 4:50pm	Crossing Chronic Iliocaval Occlusions: Tips for Success David Gillespie, MD	
4:50pm - 5:00pm	Optimal Treatment for Bilateral Iliocaval Obstruction Antonios Gasparis, MD	
5:00pm - 5:10pm	Iliocaval Obstruction: Patency and Factors That Affect Patency After Treatment Peter Pappas, MD	
5:10pm - 5:20pm	Complications of Iliocaval Recanalization Cees Wittens, MD	
5:20pm - 5:35pm	Discussion Oscar Maleti, MD	
5:35pm - 6:00pm	Panel Discussion	

HEMODYNAMIC IN VENOUS DISE Chair: Byung-Boong L		©МЭ Rm. 311
4:30pm - 4:40pm	The Hemodynamic Basis of Chronic Venous Disease Mark Mattos, MD	Diagnostic Tests in
4:40pm - 4:50pm	Hemodynamic Effect of Abolition of Reflux in Superficial Veins Alun Davies, MA, DM, FRCS, FEBVS	
4:50pm - 5:00pm	Explanation of the SFJ Reflux Patterns Massimo Cappelli, MD	
5:00pm - 5:10pm	Hemodynamic Shunts in Chronic Venous Disease Massimo Cappelli, MD	
5:10pm - 5:20pm	Proximal Deep Vein Obstruction and Hemodynamic Impact Nicos Labropoulos, PhD	
5:20pm - 5:30pm	Hemodynamic Effects of Compression in CVD Hugo Partsch, MD, FACPh	
5:30pm - 5:40pm	Hemodynamic Effects in the Microcirculation Joseph Raffetto, MD	
5:40pm - 6:00pm	Panel Discussion All Speakers	
6:30pm - 7:30pm	ACPF Donor and ACP New Member Reception By Invitation	Sheraton Hotel: Republic Ballroom

the materials you want for the knowledge you need.

patient & clinical education products

The American College of Phlebology (ACP) is committed to advancing your knowledge and skills in the field of vein care. That involves offering the latest in publications, videos and other materials to improve your practice and help you educate your patients about venous and lymphatic disease.

If you're an ACP Member, take advantage of discounts on all products.

just some of the products available

to order

Visit the ACP Products Booth in front of the Exhibition Hall.

6:00am - 6:00pm	Speaker Ready Room	Rm. 305
7:00am - 5:00pm	Exhibits Open	Hall C & D
7:00am - 8:00am	Continental Breakfast	Hall C & D
ASK THE EXPERT	TS – CONCURRENT SESSIO	NS
7:30am - 8:45am	Ultrasound Knobology: How to Optimize Your Ultrasound Chair: Diana Neuhardt, RVT, RPhS Speaker: Frank Miele, MSEE Discussant: Bill Schroedter, BS, RVT,	Rm. 302 RPhS, FSVU
7:30am - 8:45am	Pharmacomechanical Thrombolysis: Tips and Technic Chair: Mark Meissner, MD Speaker: Suresh Vedantham, MD Discussant: Antonios Gasparis, MD	Rm. 304 gues
7:30am - 8:45am	Venous Anatomy Chair: Roberto Simkin, MD Speakers: Alberto Caggiati, MD, PhL Jean-Francois Uhl, MD Discussant: Philip Coleridge-Smith I	
8:45am - 9:00am	Coffee Break	
CONCURRENT S	ESSIONS	
Chair: Marianne De Ma	HROMBOSIS (DVT) eseneer, MD Bradbury, BSc, MB, ChB, MD, MBA, FEBVS	Ballroom A/B/C
9:00am - 9:10am	Lower Extremity Venous Throm Elderly Patients Raghid Kreidy, MD, FACS	nbosis in
9:10am - 9:20am	Prevalence of Deep Vein Throm Undergoing Breast Reconstruc Autologous Tissue Transfer Hisato Konoeda, MD	
9:20am - 9:30am	Epidemiology of Phlebitis (Inflammation of the Vein) Andreas Fiebig, MD	

9:30am - 9:40am	Sulodexide Versus Low Molecular Weight Heparin for the Antithrombotic Prevention in Varicose Vein Surgery Tomasz Drazkiewicz, MD, PhD	
9:40am - 9:50am	Experimental Studies to Investigate the Relative Bleeding Effects of Dabigatran, Apixaban and Rivaroxaban Jawed Fareed, PhD	
9:50am - 10:00am	Effect of Long-Term LMWH on Post-Thrombotic Syndrome in Patients with Iliac/Non-Iliac Venous Thrombosis: A Sub-Analysis from the Home-LITE Study Russell Hull, MD	
10:00am - 10:10am	Clinical Signs and Risk Factors of Deep Veins Thrombosis of Lower Extremities. Efficiency and Safety of Anticoagulant Therapy. (Retrospective Research) Ekatarina Amosova, MD, PhD	
10:10am - 10:20am	Catheter Directed Thrombolysis in Lower Limb Deep Venous Thrombosis, Technique and Results over Last Decade Devendra Dekiwadia, MS M.Ch-CVTS	
10:20am - 10:30am	Use of Intravascular Ultrasound IVUS in Phlebology Jonathan Maples, RVS	
10:30am - 10:35am	Iliac Stenting in Patients with Iliofemoral Deep Venous Thrombosis Treated with Catheter- Directed Thrombolysis Niels Baekgaard, MD	
10:35am - 10:40am	Preventive Ultrasound Diagnostic of Deep Venous Thrombosis Igor Ignatyev, MD	
10:40am - 10:45am	Frequency of Below-the-Knee Deep Vein Thrombosis in Japanese Residents: Control Study for Residents in the Area without Earthquake Kazuhiko Hanzawa, MD, PhD	
10:45am - 10:50am	Management of Non Varicose Superficial Vein Thrombosis: Single-Centre Experience Tigran Sultanyan, MD	
10:50am - 11:00am	Question and Answer	
SOCIETY SESSION OF PHLEBOLOGY	N: AUSTRIAN SOCIETY Rm. 310	
9:00am - 9:05am	Welcome Wolfgang Salmhofer, MD	
9:05am - 9:22am	Diagnosis and Treatment of Lipedema Sanja Schuller-Petrovic, MD, PhD	
9:22am - 9:39am	Diagnosis and Investigations in Lymphedema Gabriele Menzinger, MD	

9:39am - 9:56am	Dose Finding in Compression Therapy Hugo Partsch, MD, FACPh
9:56am - 10:13am	The Microvascular Ulcer Kornelia Böhler, MD
10:13am - 10:27am	Teledermatological Management of Chronic Leg Ulcers Wolfgang Salmhofer, MD
10:27am - 10:30am	Discussion All Speakers
SOCIETY SESSION OF PHLEBOLOGY	N: CANADIAN SOCIETY Rm. 309
9:00am - 9:10am	Welcome Pauline Raymond-Martimbeau, MD, FACPh
9:10am - 9:20am	Image Challenge: Your Diagnosis Pauline Raymond-Martimbeau, MD, FACPh
9:20am - 9:30am	A Misdiagnosed Case of Posterior Nutcracker Syndrome Douglas Hill, MD, FACPh, FCFP
9:30am - 9:40am	DVT Thrombolysis for Lower Extremity DVT: Analysis of Imaging and Treatment Sanjoy Kundu, MD, FSIR, FASA, DABR, FCIRSE
9:40am - 9:50am	Treatment of Periorbital Vessels Mandy Wong, MD
9:50am - 10:00am	Uncommon Venous Lesions Michel Zummo, MD
10:00am - 10:10am	Unusual Clinical Phlebological Presentations Louis Grondin, MD, MBA, MScPD, FACPh
10:10am - 10:30am	Question and Answer All Speakers
SOCIETY SESSION OF PHLEBOLOGY	N: GERMAN SOCIETY Rm. 312
9:00am - 9:10am	Differential Diagnosis of SVT Eberhard Rabe, MD
9:10am - 9:20am	Role of Duplex Sonography in SVT Felizitas Pannier, MD
9:20am - 9:35am	Risk Factors for SVT Markus Stuecker, MD
9:35am - 9:50am	SVT and Deep Venous Thrombosis Eberhard Rabe, MD
9:50am - 10:05am	Do We Need Anticoagulation in SVT - Results from Randomized Studies Horse Gerlach, MD
10:05am - 10:15am	SVT as a Complication of Sclerotherapy Franz Xaver Breu, MD
10:15am - 10:30am	Consequences for New Guidelines / Question and Answer All Speakers

VENOUS FORUM	i, MD; Roberto Simkin, MD; Jorge Ulloa, MD
9:00am - 9:10am	Esthetic Surgery in Varicose Veins Pedro Pablo Komlos, MD
9:10am - 9:20am	Klippel Trenaunay Syndrome Global Treatment Carlos Simkin, MD; Roberto Simkin, MD
9:20am - 9:30am	Tactical Options in Laser Ablation in the Perforator Veins Oscar Bottini, MD
9:30am - 9:40am	Hybrid Treatment of Greater Saphenous Vein Incompetence with Foam and Radiofrequency: Initial Experience Jorge Ramirez, MD; Jorge Ulloa Dominguez, MD; Jorge Ulloa, MD
9:40am - 9:50am	Venous Endoablation in Office: Chilian Experience Alvaro Orrego, MD
9:50am - 10:00am	Are Laser Ablations Good Methods or is it Necessary to Combine Surgery to Solve the IVC? Ruben Bulloj, MD; Roberto Simkin, MD
10:00am - 10:10am	Ten Years of Endovenous Laser Treatment for Varicose Veins Cesar Carmelino, MD
10:10am - 11:00am	Question and Answer All Speakers
DE FLEBOLGIA Y Chair: Felix Francisco I	
9:00am - 9:05am	Opening Félix Francisco Pace, MD
9:05am - 9:15am	Advantage and Disadvantage of the Foam Sclerotherapy in Treatment of Great Saphenous Vein Aurora Avramovic, MD
9:15am - 9:25am	Complications of Foam Sclerotherapy in the Treatment of Great Saphenous Vein - Incidence TVP Miguel Avramovic, MD
9:25am - 9:35am	Therapeutics Refinement in Microsclerotherapy Daniel Balboni, MD
9:35am - 9:45am	Surgical Treatment Benefits of USF Insufficient in Laser Ablation the GVS Juan Carlos Krapp, MD

9:45am - 9:55am	Stripping of Saphenous Vein David Lesnik, MD
9:55am - 10:05am	Sclerotherapy of Saphenous Vein Alejandro Pedrazzoli, MD
10:05am - 10:15am	Sclerotherapy of Saphenous Junction Never Rosli, MD
10:15am - 10:25am	Updating of High Dosis of Sclerotherapy Eduardo Tkach, MD
10:25am - 10:35am	Laser Ablation Victor Spano, MD
10:35am - 11:00am	Final Questions and Closing Osvaldo Andoniades, MD
SOCIETY SESSIO OF PHLEBOLOGY Chair: Stefano de Franc	
9:00am - 9:15am	S-F. Junction: Hemodynamic Models and Therapeutical Approach Lorenzo Tessari, MD
9:15am - 9:30am	S-F Junction to Save? Claudio Allegra, MD
9:30am - 9:45am	Saphenofemoral Reflux: The Therapeutic Challenge. A 3D Simulator for Surgical Strategy Vincenzo Coscia, PhD
9:45am - 10:00am	Selective vs. Radical Crossectomy of the Great Saphenous Vein in Primary Venous Insufficiency: Results at 5 Years Fabrizio Mariani, MD
10:00am - 10:15am	What's New in S-F Valvuloplastic? Sante Camilli, MD
10:15am - 10:30am	Femoral Reflux and Obstruction: Surgical, Endovascular and High Technology Approaches Oscar Maleti, MD
10:30am - 11:00am	Discussion All Speakers
Chair: Kurosh Parsi, ME	LEBOLOGY – HLEBOLOGY RESEARCH BBS, MSc Med, PhD, FACD, FACP
Moderator: Mark Malou 9:00am - 9:20am	The Anatomy of Microvenous Disease
	Andre van Rij, MD
9:20am - 9:40am	Chronic Cerebrospinal Venous Insufficiency (CCSVI), Multiple Sclerosis and the Role of Chlamydia Pneumoniae Paul Thibault, MD

The Diagnosis and Treatment of Pelvic Venous Disorders Chair: Milka Greiner, MD Speaker: Melvin Rosenblatt, MD, FACPh 12:45pm - 2:00pm Controversy of the Day: Ballroom A/B/C Both Theoretical Concerns and Clinical Evidence Support a Hemodynamic Approach to Superficial Venous Reflux Chair: Peter Pappas, MD Speakers: Pro-Massimo Cappelli, MD; Con-Fedor Lurie, MD, PhD, RVT 2:00pm - 4:00pm Electronic Abstract Presentations Chair: Mark Malouf, FRACS Moderators: Paolo Casoni, MD; Stephanie Dentoni, MD; Melody Dwyer, DO; Lowell Kabnick, MD, FACS, FACPh, RPhS FREE PAPER SESSION 8 — Ballroom A/B/C PELVIC VENOUS DISORDERS AND MALFORMATIONS Chair: Barbara Pohle-Schulze, RVT, RDMS, RDCS, RPhS Discussants: Chieh-Min Fan, MD; Jorge Ulloa, MD 2:00pm - 2:10pm Prospective Evaluation of Patients with Iliofemoral Venous Thrombosis Treated with Anticoagulation Celso Dias, MD 2:10pm - 2:20pm Direct Computed Tomography Venogram in the Diagnosis of May-Thurner Syndrome Clint Hayes, MD, RVT, RPVI, FACS, FACPh Transvaginal Duplex Ultrasonography is the		***************************************
10:20am - 10:40am Local and Systemic Effects of Foam Sclerotherapy on Blood Cells, Coagulation, Systemic Biomarkers and Cardiac Enzymes Kurosh Parsi, MBBS, MSc Med, PhD, FACD, FACP 10:40am - 11:00am Question and Answer All Speakers 11:00am - 11:30am Coffee Break Visit the Exhibits 11:30am - 12:15pm Invited Lecture: Ballroom A/B/C The Diagnosis and Treatment of Pelvic Venous Disorders Chair: Milka Greiner, MD Speaker: Melvin Rosenblatt, MD, FACPh 12:45pm - 2:00pm Controversy of the Day: Ballroom A/B/C Both Theoretical Concerns and Clinical Evidence Support a Hemodynamic Approach to Superficial Venous Reflux Chair: Peter Pappas, MD Speakers: Pro-Massimo Cappelli, MD; Con-Fedor Lurie, MD, PhD, RVT 2:00pm - 4:00pm Electronic Abstract Auditorium Presentations Chair: Mark Malouf, FRACS Moderators: Paolo Casoni, MD; Stephanie Dentoni, MD; Melody Dwyer, DO; Lowell Kabnick, MD, FACS, FACPh, RPhS FREE PAPER SESSION 8 — Ballroom A/B/C PELIVIC VENOUS DISORDERS AND MALFORMATIONS Chair: Barbara Pohle-Schulze, RVT, RDMS, RDCS, RPhS Discussants: Chieh-Min Fan, MD; Jorge Ulloa, MD 2:00pm - 2:10pm Prospective Evaluation of Patients with Iliofemoral Venous Thrombosis Treated with Anticoagulation Celso Dias, MD Direct Computed Tomography Venogram in the Diagnosis of May-Thurner Syndrome Clint Hayes, MD, RVT, RPVI, FACS, FACPh 1:0:40am - 11:00am	9:40am - 10:00am	Foam Density, Viscosity and Surface Tension

OVER 100 HOURS OF CONTENT FOR ONLY \$295!

As an attendee of the XVII UIP World Meeting, we are making available the entire recorded library of sessions, including 10 sessions which qualify for *AMA PRA Category 1 Credit*^{τM}, for the low package price of \$295.

Content Includes:

- + Five days of evidence-based behavioral practice content, relevant to venous education
- + Ten of the sessions qualify for AMA PRA Category 1 Credit™
- + Faculty includes more than 300 U.S. and international venous experts, specializing in the wide range of phlebology
- + Online access anytime and anywhere
- + Presentations include: didactic lectures, difficult case presentations, procedural skills, panel discussions, expert and attendee question and answer sessions, and patient demonstrations
- + Attendees save 60% by purchasing now. Don't wait until after the conference to have anytime access to this important content.

This special pricing is available to attendees only and must be purchased before the conclusion of the meeting. Please visit the ACP Products Booth to purchase.

Controversy of the Day: There is a Clear Role for

■ Ballroom A/B/C

Superficial Venous Interventions in Healing Venous Ulcers

Chair: Marian Simka, MD, PhD Speakers: Pro-Giovanni Mosti, MD; Con-Thomas O'Donnell, MD

CONCURRENT SESSIONS

ELECTRONIC ABSTRACT PRESENTATION COMPETITION

Rm. 312

Chair: Peter Gloviczki, MD

Discussant: Andrew Bradbury, BSc, MB, ChB, MD, MBA, FEBVS, FRCSEd

2:00pm - 2:05pm Welcome and Introduction
Peter Gloviczki, MD

2:05pm - 2:15pm Oral Abstract Awards to be Presented

2:15pm - 3:18pm Electronic Abstract Presentations (Top 3 from each day)

TBD

3:18pm - 3:28pm AVF Abstract Award Presentation - The Role
Of Duplex Ultrasound In The Pelvic Congestion
Syndrome Workup

Georgios Spentzouris, MD

3:28pm - 3:38pm EVF Abstract Award Presentation - Long-Term

(5-8 Years) Follow-Up After Ultrasound-Guided Foam Sclerotherapy for Varicose Veins: Patient-Reported Outcomes (Proms), Satisfaction, and Health-Related Quality of Life

Katy Darvall, MD

3:38pm - 3:48pm RSMVF Abstract Award Presentation - Larval

Debridement Therapy in Sloughy Chronic Venous Leg Ulcers: A Randomised Controlled

Trial

Colin Davies, MSc, BSc(Hons), FAETC, RN

3:48pm - 3:53pm ACP Research Award Presentation - Does

Superficial Venous Surgery Influence The Deep Veins Hemodynamics?

Markiyan Soloviy, MD, PhD

3:53pm - 4:00pm Electronic Abstract Awards to be Presented

FREE PAPER SESSION 11 – SUPERFICIAL VENOUS DISEASE III

Ballroom A/B/C

Chair: Pier Luigi Antignani, MD

Discussants: Helane Fronek, MD, FACP, FACPh; Vadim Bogachev, MD

2:00pm - 2:10pm New 2-Ring Radial Fiber Experience in the Endovenous Laser Ablation of Varicose Veins

Ufuk Demirkilic, MD

2:10pm - 2:20pm	Comparison of 1470 nm Laser with 980nm Laser in Endovenous Laser Ablation of Saphenous Vein Varicosities Masayuki Hirokawa, MD, PhD
2:20pm - 2:30pm	Prospective Randomized Trial of Endovenous Laser Ablation of Great Saphenous Veins with 1470 nm Diode Laser and 2Ring Fibers Comparing Compression Therapy 0 Days, 7 Days and 28 Days After Therapy: Preliminary Report Uldis Maurins, MD, PhD
2:30pm - 2:40pm	Bipolar Radiofrequency Ablation of the Saphenous Veins: A Series Of 120 Patients with 2 Year-Follow-Up Claudine Hamel-Desnos, MD
2:40pm - 2:50pm	Diagnosis and Treatment of Saphenous Vein Aneurysms Ronald Bush, MD, FACS
2:50pm - 3:00pm	Fate of Great Saphenous Vein and Saphenofemoral Junction Tributaries After Laser Ablation Svatopluk Kaspar, MD
3:00pm - 3:10pm	Eccentric Compression After Sclerotherapy of Varicosities with a Self-Adhesive, Individually Applied Silicone Gel Pad Johann Ragg, MD
3:10pm - 3:20pm	Effectiveness and Clinical Outcome of Mechanochemical Ablation in Patients with Chronic Venous Disease John Koziarski, MD
3:20pm - 3:30pm	Cyanoacrylate, Catheter Based Treatment of Saphenous Vein Reflux: A Single-Center Study Over 180 Days on 114 Veins TBD
3:30pm - 3:40pm	Varicose Great Saphenous Vein: No Need for Treating 50% Junctions. From a Series of 1000 Legs Marc Lefebvre-Vilardebo, MD
3:40pm - 3:50pm	Perforating Vessels in the Medial Side of the Leg: Anatomical Dissection and Duplex Ultrasound Study Zerrouk Sammi, MD
3:50pm - 3:55pm	Turned Down - Patient Preference in the AVULS Clinical Trial Setting Tristan Lane, MBBS, BSc, MRCS
3:55pm - 4:00pm	Recurrent Varicose Veins After Vein 'Stripping' Surgery. Retreatment with Endovenous Laser Ablation Primepares Pal, MD, RPVI

Electronic Abstracts

ORDER	TOPIC
1	Our Experience in Vacuum Assisted Closure in Argentina Alejandro Kornberg, MD
2	Varicose Tributaries of Saphenous Veins: Modern Approaches to Treatment Alexander Chernookov, MD
3	Implementation of New Two-Ring Radial-Fiber Combined with 1470 nm Diode Laser as Promising Standard Treatment for Great Saphenous Vein Insufficiency (Diameter 3 cm Distal to Junction) of More than 8mm. Aljoscha Greiner, MD
4	New Treatment Options for Varicose Veins others than Trunk Insufficiencies Using the New Radial Laser Device Juergen Boehme, MD
5	Sonothrombolysis - A Systematic Review of Thrombus Dissolution Using Microbubble Augmented Ultrasound Brahman Dharmarajah, MBBS, MRCS, MA
6	Vulvar Vein Treatment Alejandro Kornberg, MD
7	Hunter's Canal: Implication in the Regulation of Femoropopliteal Venous Return? Interest for Phlebologist Celine Fortin, MD
8	Varicose Veins and Morbidly Obese Patients – Treatment Using Tactile Endovenous Ablation Technique Chung Sim Lim, MD
9	Nicolau's Livedoid Dermatitis Delayed onset after Ultrasound Guided Liquid Polidocanol Injection Cynthia Asbjornsen, DO, FACPh
10	Dynamically Cooled 1064-nm Nd: YAG Laser as a Treatment Option for Facial Reticular Veins Daniel P Friedmann, MD
11	The Effect of Dilution of Sclerosants with Water or Saline on the Critical Micelle Concentration David Connor, PhD
12	Protecting your Online Reputation: 3 things Every Phlebologist Needs to Know Sam Peek
13	Treatment of Endothermal-Heat-Induced-Thrombus using a Class-Specific Treatment Algorithm Kenneth Harper, MD, FACS, RPhS, RPVI

ORDER	TOPIC
1	Voluntary Auditory Attenuation of Noxious Surgical Stimulation in Varicose Vein Procedures David Hallstrand, MD
2	Using Endovascular Treatment for the Therapy of Great Saphenous Vein in Patients with Combined Edema without Pre-Operative Decongestion Horst Peter Steffen, MD
3	Internal Laser Valvuloplasty and Endovascular Venous Remodeling with 1470 nm Laser. Initial Experiences Enrique Luis Ferracani Ristenpart, MD
4	Cava Filter or Surgical Removal of Floating Thrombi in Deep Venous Iliac-Femoral Segment - What to Choose? Evgeny Gavrilov, MD
5	Sapheno-Popliteal Junction Hemodynamics and Variations in Femoral and Popliteal Vein Hemodynamics after Small Saphenous Vein Treatment: A Colour-Duplex Ultrasound Observational Study Fausto Campana, MD
6	Improvement in Foam Sclerotherapy with the External Application of Ultrasounds: Preliminary Results Francesc J. Casals-Sole, MD
7	Association of Radiofrequency Ablation (RFA) of the Great Saphenous Vein (GSV) and Ambulatory Phlebectomy (AP) of Collateral and Perforating Varicose Veins in an Outpatient Setting for a Better Functional Result Francesco Artale, MD
8	European Guidelines for Sclerotherapy in Chronic Venous Disorders Part 4: Diagnostic Evaluation Before and Outcome Evaluation after Sclerotherapy Franz Xaver Breu, MD
9	Superficial Vein Thrombosis of Lower Limbs on Non- Varicose Veins and Thrombophilia Salvino Bilancini, MD
10	Venous Angioplasty in Chronic Cerebro Spinal Venous Insufficiency Associated with Multiple Sclerosis: Results at 2 Years Follow Up Guillermo Eisele, MD
11	How and Why the Endovenous Radio Frequency Ablation System Works: Histopathological Investigations on the Great Saphenous Vein Treated with Endoluminal Ultrasonic Ablation Harinder Bedi, MS, MCh (CTVS), FIACS
12	The Updated International Guidelines on 'The Management of Chronic Venous Disorders of the Lower Limbs' and the Place of Venoactive Drugs Michel Perrin, MD, FACPh
13	Consequences of Population Aging on the Management of Varicose Veins by Sclerotherapy Jean-Luc Gillet, MD

ORDER	TOPIC
1	The History of Hungarian Phlebology Imre Bihari, MD, PhD
2	Current and Future Approaches to Neutralize the Bleeding Effects of Dabigatran, Rivaroxaban and Apixaban Jawed Fareed, PhD
3	3D Reconstruction of the Veins of the Lower Limbs in 3 Human Fetuses at 12-14 Weeks Jean-François Uhl, MD
4	Pregnancy does not Influence Varicose Vein Laser Surgery Results Imre Bihari, MD, PhD
5	Animals Research Victor Spano, MD
6	Phlebologic Rehabilitation Juan Agustin Chunga, MD
7	Anatomy of the Pelvic Veins Jean-François Uhl, MD
8	Cryoavulsion May Reduce Puncture Wounds in Conventional Varicosity Treatment Jung Chung, MD
9	The Extrinsic Compression Syndromes of the Deep Abdominal Veins Jean-François Uhl, MD
10	Venous Ulcer Treated by Laser Ablation Only Kamran Goudarzi, MD
11	Venous Outlet Syndrome of Hunter's Canal: A Major Cause of Femoral DVT Jean-François Uhl, MD
12	Prevalence of Small Varicosities among Patients with or without Telangiectasias on the Lower Limbs Estimated by Augmented Reality Examination Kasuo Miyake, MD, PhD
13	Case Report on Repeated Bleeding Caused by Pulsating Varicose Veins Lotte Engels, MD
14	Laser Ablation Technical Strategy to Cancel Ostium and Venous Channels by Laser Endoluminal Victor Spano, MD

ORDER	TOPIC
1	Vasodilation with Nitroglycerin will Improve Venous Access during Endovenous Thermal Ablation Mario H. Gonzalez, MD
2	A Systematic Review of Quality of Life Scales for Chronic Venous Disease of the Lower Limbs Robert Launois, PhD
3	Computational Fluid Dynamics (CFD) Modelling of Sclerosant Foam Behaviour Masud Behnia, PhD
4	Venous Cartography: A Simple Yet Effective Web Tool Matheus Figueiredo, MD
5	Thromboembolic Complications of Endovenous Thermal Ablation and Foam Sclerotherapy in the Treatment of Great Saphenous Vein Insufficiency Meghan Dermody, MD
6	Feasibility and Safety of Lower-Calf and the Ankle Region Puncture Site following Endovenous Laser Ablation of the Saphenous Veins Mehmet Atasoy, PhD
7	Case Report: Unique Sheath Tip Thrombosis during DVLA in Patient with Occult Thrombophilia Richard Mueller, MD, FACC, FACP, FASE, RPVI, RVT
8	Physiological Circadian Variability of Leg Volume in Different Postural Conditions Mirko Tessari, PhD
9	A Review of Genetics Component to Primary Venous Disease and the Direction for Future Research Muzaffar Ali Anwar, MBBS, MRCS
10	New Venous Hemodinamical and Anatomical Patterns for Great Saphenous Vein Sparing Surgery Paolo Casoni, MD
11	"Laser Crossectomy," a State Of Art In EVLA - Single Center Experience Using Radial Fiber in More Than 3000 EVLA Peformed Petar Dragic, MD
12	Case Report: Successful EVLA Treatment of 28 mm Diameter Type Va Venous Aneurysm Of GSV Accessory Vein at the Saphenofemoral Junction Richard Mueller, MD, FACC, FACP, FASE, RPVI, RVT
13	Quality of Life and Costs of Chronic Venous Disorders: Worldwide Results from the Vein Consult Program Robert Launois, PhD

ORDER	TOPIC
1	Duplex Scan Aspect of the Sapheno-Femoral Junction 6 Years after Endovenous Laser Ablation Frederic Vin, MD, FACPh
2	Endothelial Protection by Aminaphtone: A New Method to Study Capillary-Like Structures Stability in Vitro Rossella Di Stefano, MD
3	Endovenous Laser Ablation of Great Saphenous Veins Ruben Vellettaz, MD
4	Duplex Scan Evaluation of the Efficiency of Greater Saphenous Vein Foam Sclerotherapy Frederic Vin, MD, FACPh
5	Omohyoid Muscle Entrapment of the Internal Jugular Vein in CCSVI Patients: Clinical and Operative Consequences Sergio Gianesini, MD
6	What is the Evidence that Total Foam Volume is Related to Safety? Stephan Guggenbichler, MD
7	Endovenous Laser Ablation without Tumescent Local Anaesthesia (TLA) - 1000 Legs Treated Julio Ferreira, MD
8	Micronized Purified Flavonoid Fraction Treatment Improves Cutaneous Outcomes and Patients' Satisfaction with Sclerotherapy for Superficial Varicosities Vincent Crébassa, MD
9	Saphenofemoral Reflux: The Therapeutic Challenge. A 3D Simulator for Surgical Strategy Vincenzo Coscia, PhD
10	Endovenous Saphenous Ablation in Patients with Acute Isolated Spontaneous Superficial-Vein Thrombosis Wayne Gradman, MD, FACPh
11	Effectiveness of Single-Use Laser Fibers in Endovenous Laser Ablation Won Suk Chung, MD
12	Five Year Result of Endovenous Radiofrequency Ablation for Superficial Venous Insufficiency of the Great Saphenous Vein Wooshik Kim, MD
13	Chronic Venous Disorder Registry Yung-Wei Chi, DO, FAHA, FSVM

ORDER	TOPIC
1	A Tool to Compare the Results of Curative Treatments: The Maximum Diameter of Varicose Veins Andre Cornu-Thenard, MD, FACPh
2	Treatment of the Small Saphenous Vein using 1470nm Diode Laser and the Radial Fiber Ted King, MD, FACPh
3	Foam Sclerotherapy for Reticular Veins of the Chest: A Retrospective Review of Efficacy and Safety Daniel P Friedmann, MD
4	Detergent Sclerosants Induce in Vitro Platelet Activation, but Inhibit Aggregation by Inhibition of GpIIb/IIIa David Connor, PhD
5	Femoral-Iliac Venous Graft Synthetic Bypass of the Unilateral Occlusion of the Iliac Vein in a Case of Post-Thrombotic Disease of Right Leg with Nonhealing Ulcer Evgeny Gavrilov, MD
6	Low Predictability of Thrombotic Risk following Endovenous Laser Ablation for Chronic Venous Disease Ted King, MD, FACPh
7	Value of CO2-O2 Based Foam in Sclerotherapy. A German Prospective Multicenter Observational Study Franz Xaver Breu, MD
8	Excision of Spontaneous Palma and other Secondary Varicose Veins in the Absence of Patent Deep Axial Veins Imre Bihari, MD, PhD
9	To Evaluate the Efficacy of Adjunctive Treatment with Endovenous Thermal Ablation: A Comparative Study Ted King, MD, FACPh
10	Fill & Aspirate Foam Sclerotherapy (FAFS): A New Approach for Sclerotherapy to the Large Superficial Varicosities at the Time of Endovenous Laser Ablation(ELA) Mehmet Atasoy, PhD
11	Venous Paediatric Trauma: Systematic Review of Injuries and Management Brahman Dharmarajah, MBBS,MRCS,MA
12	Endovascular Treatment of May Thurner Syndrome Nathalie Hernandez-Cardenas, RVT
13	A Ca and Cb for Each C Class of the CEAP Classification Andre Cornu-Thenard, MD, FACPh
14	Vascular Endothelium Disturbances in Patients with Chronic Venous Disease - An Evaluation Based on the Flow - Mediated Dilatation Tomasz Urbanek, MD, PhD

ORDER	TOPIC
1	Segmental Reflux in Lower Limbs Alejandro Kornberg, MD
2	Severity Scoring of Venous Insufficiency using Phase- Contrast MR Imgaging and Duplex Ultrasound Birgit K Kahle, MD
3	High Frequency of Arteriovenous Fistula in Chronic Venous Ulcers Bruce Hoyle, MD
4	Pelvic Lymphadenectomy Resulting in Lymphedema Emily Iker, MD
5	Introduction of Complete Decongestive Therapy Principles to the Phlebology Clinic John Hovorka, MD, FACS
6	Outcome of Simultaneous Endovenous Laser Ablation and Foam Sclerotherapy of the Saphenous Reflux: 3 Year Results Sehoon Kang, MD
7	Functional Methods in Diagnostics and Treatment of Patients with Combined Involvement of Venous and Musculoskeletal System of Lower Extremities Sergey Katorkin, MD
8	Anterior Accessory Great Saphenous Vein Treated with Endovenous Laser Svatopluk Kaspar, MD
9	Perforator Treatment with Percutaneous Laser, Control Eco Doppler Alejandro Kornberg, MD
10	Diagnosis and Management of Left Renal Vein Entrapment - Nutcracker Syndrome Tamara Keith, MBBS
11	Significance of Epigastric Vein in Laser Ablation of Great Saphenous Kamran Goudarzi, MD
12	Endovenous Radiofrequency Ablation in Old Patients with Varicose Vein: Clinical Analysis of Efficacy and Safety Wooshik Kim, MD

ORDER	TOPIC
1	Pigmentation in the Ceap Classification may be Unreliable as a Marker of Severe Chronic Venous Disorder Christopher R Lattimer, MD
2	Flush Ablation of Short Stump Saphenofemoral Junction Recurrent Varicose Veins - A Method using Endovenous Laser Chung Sim Lim, MD
3	The Role of the Surgery in the Age of EVLT and Venefit Procedures Daniela Radu, MD
4	VenaSeal Closure System First in Man Study - 2 Year Follow-Up Edward Mackay, MD, FACS
5	Randomized Study to Determine Body Mass Index as an Isolated Risk Factor for Saphenous Reflux Diagnosed with Vascular Ultrasound in the Spanish Hospital of Mexico City Iker Leon, MD
6	Management Issues in Female Klippel-Trenaunay Patients Across the Generations Joann Lohr, MD
7	The use of Vibration for Pain Reduction in Sclerotherapy: Both Vibro-Anaesthesia and Vibrating Needles John Marx, MD
8	Use of Phlebolymphology Ultrasound in the Management of the Patient in Phlebolgy Clinic with Comorbid Lymphedema Jonathan Maples, RVS
9	Conservative and Surgical Treatment for Acute Varicose Thrombophlebitis: Comparative Evaluation of the Results (Three-Year Prospective Study) Leonid Markulan, MD
10	What Triggers Venous Symptoms? Nicos Labropoulos, PhD
11	Temperature Profiles of 980 nm and 1470 nm Endovenous Laser Ablation, Endovenous Radiofrequency Ablation and Endovenous Steam Ablation Wendy Malskat, MD
12	Mechanochemical Ablation of the GSV using Clarivein and Polidocanol Foam: Preliminary Results of the Dose-Finding Study Yee Lai Lam
13	Congenital Venous Malformations Manifested as Varicose Disease: Diagnosis and Treatment Zivan Maksimovic, MD

	DEI TEMBER 10, 2010 DITITION T
ORDER	TOPIC
1	Sourcing Based Foam Sclerotherapy: My Worst Case Alfred Obermayer, MD
2	An Ultrasound Model to Calculate the Brain Blood Outflow through Collateral Vessels Erica Menegatti, PhD
3	Experiences with Hot Steam Treatment of Sidebranches, Groin Recidives and Perforators in Mmore than 1500 Cases over Four Years Florian J Netzer, MD
4	Effects of Micronised Purified Flavonoid Fraction on Symptoms and Quality of Life in Patients Suffering from Chronic Venous Disease Albert-Adrien Ramelet, MD
5	Case Report of 195 Patients Classified by Duplex Scanning and Augmented Reality, and Treated by Cryo-Laser & Cryo-Sclerotherapy: Results and Complications Kasuo Miyake, MD, PhD
6	Endovenous Laser Ablation (1470 nm) of the Small Saphenous Vein: Outcomes and Assessment of Patient Satisfaction Luciane Narvaes, MD
7	Efficacy of Foam Ultrasound Guided Foam Sclerotherapy of Varicose Small Saphenous Veins , Mid- and Longterm Results Renate Dorothea Murena-Schmidt, MD
8	Micro-Dose Lidocaine Tumescent Anesthesia for EVLA in the Drug Shortage Era Richard Mueller, MD, FACC, FACP, FASE, RPVI, RVT
9	Use of a New Device for Lymphoedema Treatment: Preliminary Study Sandro Michelini, MD
10	Heterogeneity of Clinical Outcome Measures in Chronic Cerebrovascular Venous Insufficiency Sarah Onida, BSc, MBBS, MRCS
11	15 Years Experience with Radio Frequency Ablation (RFA) Thomas Noppeney, MD
12	Anatomical Distribution and Physiological Impact of Venous Reflux of Saphenous Tributaries in Primary Varicose Vein Tomohiro Ogawa, MD, PhD
13	Endovenous Laser Treatment for Small Saphenous Vein Reflux: Effectiveness and Safety Vineet Mishra, MD

ORDER	TOPIC
1	Prospective Observational Study on Patients with Varicose Veins Treated with Foam Sclerotherapy Bernhard Partsch, MD
2	Bacterial Contamination does not Necessarily Mean Infection Carlos Sanchez Fernandez de la Vega, MD
3	Should we Consider Venous Pain as Part of Chronic Venous Disease? Eberhard Rabe, MD
4	The Role of Lymphoscintigraphy in Venous Ablation EJ Sanchez, MD, FACC
5	European Guidelines for Sclerotherapy in Chronic Venous Disorders Part 1: Indications, Contraindications and Results Felizitas Pannier, MD
6	Foam Ultrasound-Guided Sclerotherapy Treatment for Varicose Veins of Saphenous Axes with Diameter Greater than 10 mm Gonzalo Orallo, MD
7	A New Method for the Production of Foam Sclerotherapy Francesc J. Casals-Sole, MD
8	Endovenous Laser Ablation: Damage of Venous Wall Treated in Vivo with Radial Fiber and 1470 nm Diode Laser Matvey Parikov, MD
9	First Clinical Experience of Endovenous Pulsed Laser Ablation with High Peak Power Naoki Sakakibara, MD
10	UGFS of Great Saphenous Vein: How to Make Immediate Results Better? Nikita Shestak, MD
11	Caring for an Infant with (KT) Klippel Trenaunay Syndrome Complicated by Microcystic Lymphatic Malformation of Left Lower Quadrant Phyllis Tubbs-Gingerich, RN, BSN, LE, CLT
12	The Relationship between Dressing Changes and Blister Formation Won Suk Chung, MD
13	Getting a Leg Up: Social Media that Works for Today's Phlebologists Sam Peek

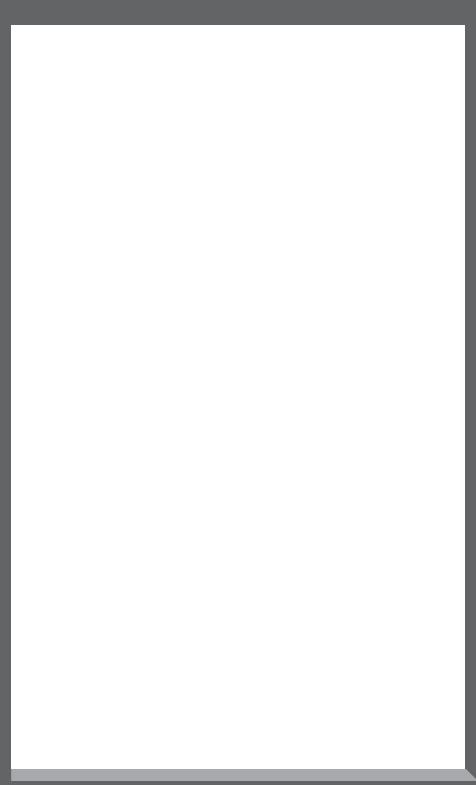

ORDER	TOPIC
1	Mechanism of Venous Recanalization after Post- Thrombotic Syndrome or Endoluminal Therapeutic Ablation Alejandro Kornberg, MD
2	Foam Sclerotherapy for Reticular Veins of the Dorsal Hands: A Retrospective Review of Patient Outcomes and Adverse Events Daniel P Friedmann, MD
3	Sclerosant Foam Structure is Strongly Influences by the Liquid Air Fraction and the use of Filters David Connor, PhD
4	Mechano-Chemical Endovenous Ablation of Great Saphenous Vein Insufficiency Using the Clarivein™ Catheter: Registry Study Doeke Boersma, MD
5	Response to Lymphedema Treatment Assessed by Ultrasound <i>Emily Iker, MD</i>
6	Safety and Tolerability of Steam Vein Ablation Procedure in an Office-Based Setting Vaclav Pechacek, MD
7	Our Combined Experience Treating Laser and Surgery in Chronic Venous Insufficiency. Technical Lepe. (Ecodoppler Adressed Endovascular Percutaneos Laser) Alejandro Kornberg, MD
8	Experience with 130,000 Sclerotherapy Injections Imre Bihari, MD, PhD
9	Evaluation of Sheathless Laser Fiber for EVLA Kamran Goudarzi, MD
10	The Effect of Temperature on Sclerosant Foam Stability Masud Behnia, PhD
11	Progressive Improvement in Quality of Life after Jugular Balloon Dilation in Patients with Autonomic Dysfunction Michael Arata, MD
12	Update of the Endo-Venous Laser Treatment - Focus on the Short Saphenous Vein: One Center Experience Tomasz Zubilewicz, MD, PhD
13	Minimally Invasive Endovenous Laser Ablation with a 1320nm Laser in the Treatment of Lower Extremity Venous Disease and Venous Ulcers Vineet Mishra, MD
14	A Novel Hybrid Adaptive Compression Device Including Pneumatic Compression: A Phase 2 Study. Hugo Partsch, MD, FACPh

ORDER	TOPIC
1	Distal DVT Alessandro Pieri, MD
2	European Guidelines for Sclerotherapy in Chronic Venous Disorders Part 3: Principles of Liquid and Foam Sclerotherapy Eberhard Rabe, MD
3	Case Report: Successful EVLA Occlusion of Both Channels of a Great Saphenous Vein Bisected Longitudinally by Chronic Superficial Venous Thrombosis Richard Mueller, MD, FACC, FACP, FASE, RPVI, RVT
4	The UK Varicose Vein Story 1989-2010 Hayley Moore
5	Venous Aneurysms of the Lower Limbs Personal Experience José Pereira Albino, MD
6	A UK View - Where does Venous Disease Fit in the Vascular Surgeon's Workload? Hayley Moore
7	Prevalence of Chronic Venous Disease in India Ramakrishna Pinjala, MS
8	Metronomes & Metric Devices for Endovenous Ablation Richard Mueller, MD, FACC, FACP, FASE, RPVI, RVT
9	Social Media Marketing: Avoiding Legal Pitfalls Sam Peek
10	Subcutaneous Nitroglycerin for Venodilation & Prevention of Venospasm in Endovenous Ablation Procedures Richard Mueller, MD, FACC, FACP, FASE, RPVI, RVT
11	Eighteen Month Single Center Experience on Cyanoacrylate Embolization Of N = 200 Incompetent Great and Small Saphenous, Tributary and Perforator Veins Thomas Proebstle, MD, PhD
12	Haemodynamic Measurements around a Femoral Vein Valve by Duplex Ultrasound Hayley Moore
13	Start to Finish: How to Create a Successful Marketing Campaign in 3 Steps Sam Peek
14	Bacteria Colonize Vascular and Perivascular Tissues of Calf and Thigh in Atherosclerosis and Controls Waldemar Olszewski, MD, PhD

ORDER	TOPIC
1	Venous Aneurysms of the Lower Limbs Personal Experience José Pereira Albino, MD
2	Late Severe Infection on Leg after Endovenous Laser Procedure of the Great Saphenous Vein Antonio Reichelt, MD, IEWG
3	Compression Therapy in Venous Leg Ulcers Treatment. Twelve-Years Follow Up Carlos Sanchez Fernandez de la Vega, MD
4	The Role of Lymphoscintigraphy in the Differential Diagnosis of Popliteal Cysts EJ Sanchez, MD, FACC
5	Venous Thromboembolism Survey in Fukushima after East Japan Earthquake 2011 Hirono Satokawa, MD

Video Presentations

These videos will be running continuously every day in the Exhibit Hall.

Echo-Guided Foam Sclerotherapy

The way foam sclerotherapy is done at Spaco Vascular, a vein clinic from Sao Paulo, Brazil. A simple, safe and effective method.

Eduardo Aguiar

Measurement of Compression and Stiffness Factor

Measurement of compression and stiffness factor of elastic and inelastic materials and explanation of the different of the different compression and stiffness factors.

Karen Broome

DVT Case Study

Case study illustrating the caprini score.

Joseph Caprini

Clinical Effectiveness of Hemodynamic Saphenous Sparing Surgery at a Very Advanced Stage of CVI

This clip present a case report of a Class C6 CEAP saphenous varicose veins complicated by an extensive lipodermatosclerosis treated with hemodynamic sparing surgery. The Hemodynamic choise is based on the perforator pattern taht is analized before and after the treatment. Clinical and hemodynamic results are shown.

Stefano Ermini

Perthes Test: Expectation of CHIVA Cosmetis Outcomes

This clip shows an alternative choise in the cosmetic treatment of extensive varicose veins. A simple disconnection of the vein is performed in lieu of an extensive phlebectomy or a sclerotherapic treatment of the visible tributary concurrently with a saphenous reflux treatment. The final result can be anticipated with a pre-operative Pethes test.

Stefano Ermini

Competence of the SFJ Terminal Valve and Varicose Veins of the LSV

This clip presents the case report of a conservative hemodynamic treatment of a Class 2 CEAP saphenous varicose vein. The choice is based on the SFJ terminal valve competence and on the presence of a centrifugal flow in the saphenous axe during the contractive phase of the muscle pump. The goal of the strategy treatment is to eliminate the centripetal flow into the saphenous trunk during the relaxation phase of the muscle pump and the presence of a centripetal flow during contraction. This is demonstrated in the final check-up.

Stefano Ermini

IVL (Internal Laswer Valvuloplasty) and EVLAR (Endovenous Laser Remodeling) with 1470 NM Initial Experiences

Complete in Vivo surgery with angioscopy, ultrasound control, seldinger approach, laser remodeling. Initial and ending results

Enrique Ferracani

Ambulatory Phlebectomy

The technique of ambulatory phlebectomy under local anaesthetic demonstrating administration of local anaesthetic, punch biopsy of skin, vein hook manipulation, vein extraction, before and after clinical photographs.

Haroun Gajraj

Sclerotherapy for Telangiectasias

The technique of microsclerotherapy for leg vein telangiectasias and reticular veins demonstrating injection technique, blanching of vessels, transillumination of reticular veins, thrombectomy of coagulum, before and after clinical photographs.

Haroun Gajraj

The Use of IVUS in Iliofemoral Venous Stenting

This video demonstrates the techniques used in iliofemoral venous stenting ultrasound guided venous access of the jugular and femoral veins, the use and interpretation of intravascular ultrasonagraphy for thrombotic and non-thrombotic venous disease as well as its use as a guide to venous stenting.

David Gillespie

A Guide to Transvaginal Duplex Ultrasound

A transvaginal sonogram demonstrating reflux within the Internal Iliac Veins and left Ovarian Vein in a patient with pelvic congestion syndrome.

Judy Holdstock

Horizontal Phlebectomy: A Novel Technique for Small Branch Veins and Reticular Veins

This video describes a new technique of horizontal phlebectomy for the mechanical disruption of small and medium size veins. We focus on the technical aspects of the procedure. Disclosure - Drs. Boyle and Jones assited in the development of the VenX device, and have a financial interest in the company.

Andrew Jones

Single Needle Laser Ablation of Incompetent Perforator Veins

The video demonstrates our single needle technique for Perforator Vein ablation and presents 2 cases.

Douglas Joyce

Ultrasound-Guided Miniphlebectomy Using Foam Sclerosant as a Guide

Using foam sclerotherapy before doing the miniphlebectomy not only decreases bleeding and allows a more comprehensive closure of abnormal varicose veins, but also allows the ability to perform ultrasound-guided miniphlebectomy. This technique using the ultrasound allows a quicker procedure particularly when the location of the vein sometimes is difficult to precisely detect with the hooks after tumescent anesthesia has been administered. The vein can be located faster, and removed more quickly, and the remaining pieces can be found easily. This is more practical in patients who have more adipose tissue.

Elsie Koh

An Overview of Leg Vein Treatments by Modern Techniques

Superficial vein scoring by duplex-scanning and augmented reality examination: description of a new way to direct patients seeking cosmetic result (Score 9-1). New leg vein treatment option by combining transdermal laser, skin air cooling and sclerotherapy (CLaCS - CryoLaser & CryoSclerotherapy): description and 2 cases presentation.

Kasuo Miyake

Transilluminated Powered Phlebectomy: Technique and Outcomes

The preliminary surgical video demonstrates preoperative work up, intraoperative technique and post-operative results of a single patient undergoing the Trivex procedure. Highlighted technical tips for optimal outcome include: outlining varicosities in upright position; removal of as much blood and fluid as possible and full-length leg compression. The conclusion of the video highlights prospectively captured data from our patient series, which is currently the largest described, including 369 patients (478 limbs). This data is meant to inform the viewer of the expected outcomes and complication rates.

Andrea Obi

Clinical Implication of Pulse Duration and Peak Power for Endovenous Laser Ablation: In Vitro Study

This study examines the performance of various wavelength lasers in vitro. The phantom study using white paper shows burning only with the 1470nm laser. The phantom study using black paper shows burning with all wavelengths. However flame appeared only with CW lasers, regardless of wavelength. PW laser shows shock wave phenomena without a major flame. When laser energy is emitted in blood, CW lasers start blood coagulation immediately regardless of wavelength. As compared to CW lasers, PW laser shows no coagulation in blood. Pulse duration and peak power are crucial to improve endovenous laser ablation. Clear tip mode may yield painless EVLA in the future.

Naoki Sakakibara

Laser Wounds Biostimulation & Debriedment

Steps of the laser treatment: 1. Biostimulation, 2. Pigmetation with blue methylene and scanner, 3. Preparation of the dressing, 4. Cover the wound, 5. Bend the leg.

Elena Sartori

Hemangioma Laser Treatement

Treatment is divided in 2 stages: 1. Photocoagulation, 2. Ablation of the vascular lesion. This treatment doesn't need anaesthesia.

Elena Sartori

Endoperivenous Laser Treatment with FTF System

Endolasering with microoptical fiber can cause photocoagulation of vessel walls thanks to the direct intra-extra venous contact.

Elena Sartori

The TRansLuminal Occlusion of Perforators (TRLOP) Technique

Percutaneous closure of incompetent perforating veins under local anaesthetic using the Trans Luminal Occlusion of Perforators 9TRLOP) technique.

Mark Whitelev

Platinum Sponsor of the UIP XVII World Meeting

"But after comparing the results of the TVS 1470 and talking to my patients, I could not help but buy it."

The superior 1470 wavelength targets interstitial water and has up to 1500 times greater water absorption than the other popular wavelengths. Operating at only 3-5 watts results in less bruising, less swelling and virtually no post operative pain.

Lowest supply cost per procedure in the industry!

Vein Care Continues its Ascent

November 6 - 9, 2014 JW Marriott Desert Ridge Resort Phoenix, AZ

The ACP's 28TH Annual Congress will provide vein care practitioners with the latest techniques, innovative content, interaction with internationally recognized faculty and opportunities for all levels of skill to gain the tools needed to improve patient care. Join us November 6 - 9, 2014 at the JW Marriott Desert Ridge Resort in Phoenix, AZ for this important meeting.

> PLAN AHEAD FOR THE 2015 ANNUAL CONGRESS November 12 - 15, 2015 Hilton Bonnet Creek Orlando, FL
